

RUTGERS
THE STATE UNIVERSITY
OF NEW JERSEY

Faculty Positions in Infectious Disease Research

The **Public Health Research Institute (PHRI; www.phri.org)** of New Jersey Medical School, Rutgers Biomedical and Health Sciences, located in Newark, New Jersey, is recruiting two faculty members at the intermediate or senior levels. PHRI is a leading infectious disease research center that emphasizes basic and translational sciences. Candidates must have a Ph.D. and/or an M.D. and a funded research program addressing critical questions in fungal, bacterial, or viral biology and/or host responses. Concurrent active clinical practice will also be highly regarded. Preference will be given to programs focused on respiratory infections. PHRI is housed in a state of the art research facility that has extensive core services, including a nationally designated BSL3 laboratory and animal facilities and an X-ray facility for structural studies. PHRI offers a robust and highly collegial research environment, generous start-up funds, and a comprehensive benefits package. Candidates should submit a curriculum vitae, a statement of research interests and accomplishments, and a list of at least three references.

Any questions or applications should be sent to: **Dr. Barry Kreiswirth, Chair Recruitment Committee, Public Health Research Institute, New Jersey Medical School, Rutgers Biomedical and Health Sciences, 225 Warren Street, Newark, NJ 07103. Tel: (973) 854-3240; Fax: (973) 854-3101; Email: kreiswba@njms.rutgers.edu**
